Nu Html Checker

This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change

Showing results for references.html

Checker Input

Show ☑ source   ☐ outline   ☐ image report   [Options…]

Check by [file upload ⌄] [Choose File] No file chosen

Uploaded files with .xhtml or .xht extensions are parsed using the XML parser.

[Check]

Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings.

[Message Filtering]

1. **Error** **Element** `input` **not allowed as child of element** `ul` **in this context.**

    (Suppressing further errors from this subtree.)

    From line 27, column 17; to line 27, column 50

    ```
                <input type="checkbox" id="check">↵
    ```

    Contexts in which element `input` may be used:
        Where phrasing content is expected.
    Content model for element `ul`:
        Zero or more `li` and script-supporting elements.

2. **Error** **Element** `span` **not allowed as child of element** `ul` **in this context.**

    (Suppressing further errors from this subtree.)

    From line 28, column 17; to line 28, column 39

    ```
                <span class="navlinks">↵
    ```

    Contexts in which element `span` may be used:
        Where phrasing content is expected.
    Content model for element `ul`:
        Zero or more `li` and script-supporting elements.

3. **Error** **Element** `label` **not allowed as child of element** `ul` **in this context.**

    (Suppressing further errors from this subtree.)

    From line 35, column 17; to line 35, column 53

    ```
                <label for="check" class="open-menu"><i cla
    ```

    Contexts in which element `label` may be used:
        Where phrasing content is expected.
    Content model for element `ul`:

Zero or more `li` and `script-supporting` elements.

---

4. **Error** **Element** `span` **not allowed as child of element** `ul` **in this context. (Suppressing further errors from this subtree.)**

    From line 108, column 17; to line 108, column 38

    ```
    <span class="socials">↵
    ```

    Contexts in which element `span` may be used:
    Where phrasing content is expected.
    Content model for element `ul`:
    Zero or more `li` and `script-supporting` elements.
